

The Illinois Society of Periodontists

Presents

Implant Prosthetic Update for The Periodontist and The Restorative Team

A Day with Dr. Robert Blackwell

Your restorative team often relies on you to provide prosthetic assistance for your implant. Are you giving them current and correct information? This program is designed to update you with the latest in prosthetic methodology. It is a perfect program to bring several of your larger referring Dentists and/or some newbies whom you would like to do more implants with. Dr. Blackwell's entertaining and informative presentation offers many ideas from over 25 years of restorative experience.

Topics to be addressed:

- Pre Op Prosthetic Planning
- New Abutment options and indications
- Usage of implants for bridge abutments
- Screw retention vs Cement
- Management of tight restorative spaces (cantilevers?)
- Fully edentulous case planning & prosthesis type
- Fixed vs removable prosthesis / bar indications / attachments
- All on 4 (the good, the bad & the ugly)
- Dealing with prosthetic complications (loose screws, breakage, etc)

Saturday, April 23, 2016 8:30 - 4:00

Dr. Blackwell is currently a Clinical Associate Professor and Chair of the Department of Graduate education as well as the Director of Implant Dentistry at SIU. He received his DDS from the University of Illinois and served his residency at Michael Reese Hospital and Medical Center in Chicago. Bob has had extensive implant restorative experience for over 30 years on thousands of cases. Dr Blackwell has lectured both nationally and internationally for more than 25 years and is known for his pragmatic approaches for dealing with implant complexities.
